Programming to control **volume and power** functions

Step 1: Brand Search/Auto Search

- https://www.aminocom.com/content/8-legal/3-docs/tv-brand-code-sets-for-willow-oak-birch-mini-maxi-remote.pdf
- Press 1 and 3 simultaneously until TV-LED flashes twice and remains on.
- Release keys then enter the 4-digit TV brand code.
    - You can enter 9999 or no digits for auto search. (*Auto-search is recommended*)
    - If valid the TV-LED gives a confirmation flash (two flashes) and remains on.
    - If invalid, the TV-LED gives error flash (rapid flashing/flickering) and returns to user mode.
- Hold Mute key - if TV doesn't mute continue to hold button.
- Release Mute key when TV mutes.
- Check to confirm remote is working- press keys **TV/AUX-POWER, TV-INPUT, VOL+, VOL-, MUTE**

Step 2: Volume keys mode

- To set volume keys as TV keys
    - Press keys **MENU** and **3** simultaneously- TV-LED gives a confirmation flash.
- To set volume keys as STB keys
    - Press keys **MENU** and **4** simultaneously- TV-LED gives a confirmation flash. **IR or RF mode.**

Programming to control **channel** functions

- **IR mode:** Press **MENU** and **1** simultaneously- STB-POWER-LED flashes twice to confirm.
- **RF mode:** Press keys **MENU** and **2** simultaneously- STB-POWER-LED flashed twice to confirm. The remote is now in BLE mode.

Unpairing

- If the remote is unpaired, it will disconnect from the STB immediately but will stay in IR mode.

    To unpair the remote from the STB:
    - Press keys **1** and **6** simultaneously until TV-LED flashes twice.
    - Enter the key sequence **9 8 2**. TV-LED turns off and the STB-POWER-LED flashes twice to confirm.

Factory Reset

- After a Factory Reset (FR), the remote is not paired and is in BLE mode. All data stored in the remote is removed.

    To do a factory reset:
    - Press keys **1** and **6** simultaneously- the TV-LED will flash twice and remain on.
    - Enter the key sequence **9 8 1**.
        - The remote deletes all settings and returns to factory default mode. The STB-LED gives a confirmation flash and the remote control returns to user mode.
        - If the key sequence is invalid, or not received within 30 seconds, the process times out, and the TV-LED gives an error flash and the remote returns to user mode.
